# Ybrayym Abamov

SOFTWARE ENGINEER

EXPERIENCE

LEAD BACK-END DEVELOPER

Prentus | Aug 2020 - ongoing

- Designing physical table structures to client parameters, integrating business goals and data set characteristics to streamline data entry and processing.
- Developing modular layer components for use in customized database structures, tailoring individual layers to dataset types and business goals.
- Reviewing code to validate structures, assess security and verify browser, device and operating system compatibility.
- Collaborating with in-house web designers to create sleek and innovative UI design.
- Multi-tasking across multiple focuses to generate project results and meet deadlines and organizational expectations.

BACK-END SOFTWARE ENGINEERING COACH

Kenzie Academy | Aug 2019 - Sep 2020

- Taught students data structures & algorithms, resulting in more students passing their semester and increasing graduation rates.
- Reviewed Python code and gave constructive feedback to better equip students with computer science concepts and best practices.
- Assisted students with their day-to-day challenges through one-on-one sessions, enabling them to feel more confident in themselves and their work
- Worked with managers to develop better strategies for students' success.

VOLUNTEERING

STARFISH INITIATIVE

Software Developer | Aug 2020 - Sep 2020

Built a customized Excel function for the Dir. Of Mentor Engagement that automatically calculates the distance and duration of different locations in various metric units.

KENZIE ACADEMY

Representative | July 2019 - July 2020

Gave presentations for different high schools about Kenzie Academy, and recruited multiple students, helping to better high school students' future and generating over $25,000 for the company's profit.
